50X1-HUM

1. Work on the construction of the water reservoir at Dzierzno (18° 35'E, 50° 23'N) has been accelerated because the water reservoirs at Otmuchow (17° 12'E, 50° 28'N) and Turawa (18° 5'E, 50° 44'N) are not fulfilling their function of supplying sufficient water for navigation on the Oder river at certain periods of the year. The Dzierzno reservoir will have a capacity of 40,000,000 cubic meters.
2. Work has likewise been speeded up on the reservoir under construction at Mianowo (Swidnica/Schweidnitz district) for the same reason. This reservoir will have a capacity of approximately 65,000,000 cubic meters.
